

Dated: December 29, 2034

We are excited to announce that we now have an interactive GIS tax map system for the Town of Thornton available for the public to use. This easy-to-use online system allows the public to query, browse, report and print maps from their own computers.

This is the final stage of our tax map update process that we started in 2020. The physical maps were completed and released on April 1, 2022, and now we have this amazing resource available for you.

With the system you will be able to find abutters, run reports, print labels, view multiple map layers and find parcel details. There is also a drawing tool, a measuring tool, street view, birds eye view and other useful attributes available within the system.

This system will be updated monthly with new ownership, address changes and assessing information. (For up-to-date information regarding assessing details, it is always best to contact the Assessing Department.)

Maps are updated annually after April 1st of each year with new subdivisions, boundary line adjustments, etc.

Please go to our Tax Map page of our website and click on the icon to visit the new system.
